Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Face in view of Shimazutsu et al..

3. Face discloses the invention as substantially as claimed where: 5 is a roller/cam follower; 7,8 is a detecting means; and 9 is a calculation means as claimed. However, Face does not disclose the plural rollers and plural detecting means as claimed. Shimazutsu et al. discloses that it is known to use a plurality of detecting means in a shape measuring device for the purpose of making a plurality of shape measurements. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to duplicate the rollers and detecting means of Face in the manner taught by Shimazutsu et al. for the purpose of allowing multiple shape measurements to be made with the Face device.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
